ACGR Conflict of Interest in Examination Guidelines

The use of independent thesis examiners is an important defining feature of Australian Higher Degree by Research (HDR) programs. The independence of examiners is one indicator of the quality of the examination process and of the course as a whole.

The process of examination/classification of theses assumes that those responsible undertake the task independently and without bias. Professional and personal relationships between examiners, candidates and their supervisors/advisors, and relationships between examiners and the University, have the potential to introduce bias and thus compromise the independence of the examination, in fact or in perception.

The independence of examiners can be ensured by the use of:

- internal guidelines on what might constitute (risk of perception of) conflict of interest,
- a nomination process with a formal review procedure.

There are a range of circumstances that can lead to a conflict of interest. The guidelines below list examples of different types of conflict of interest that may arise between the various parties including the candidate, the supervisor/advisor, the University, the subject matter itself and another examiner. The list is indicative and is not to be considered exhaustive.

In managing conflicts of interest in the examination process it is useful to:

- Distinguish major (potential) conflicts of interest that would normally result in the non-appointment of the examiner from minor (potential) conflicts that should be declared and explained but which should not normally, independently of other considerations, inhibit the appointment of the examiner.
- Recognise that some conflicts of interest arising through collaboration on publications and/or research grants, or membership of an advisory board, may be mitigated by the size of the team and a corresponding relative independence of some members of the team. Indeed in some cases, members of a team may never have met nor corresponded directly.

It is also important to note that the presence or perception of possible conflict of interest between the examiner and the candidate or other parties should not necessarily and automatically preclude the use of that examiner. What is important is that a fair and transparently “unconflicted” examination can take place. With responsible management of a declared conflict it may be possible to achieve this aim.

Conflicts of Interest

Listed below are examples of different types of conflict of interest that may arise between the examiner and various parties including the candidate, the supervisor/advisor, the University, the subject matter itself and another examiner. The list is indicative and is not to be considered exhaustive.

Additional notes on management of the guidelines

In managing the Conflict of Interest guidelines it is useful to remind those who are nominating examiners that the purpose of the guidelines is to ensure the independence of the examination in both fact and perception. The guidelines are designed to protect the candidate, examiner and the University against potential negative perceptions during and beyond the examination process. There is no presumption that any individual will behave inappropriately.

It would be unreasonable to expect potential examiners to make decisions about their suitability to examine (with reference to these or other guidelines), though it is reasonable to expect them to declare conflicts of interest and to make provision for this in examiners' reporting forms. The nomination of examiners is best made by the supervisory team and/or enrolling school and subsequently formally approved by a third party. In many institutions formal approval will be by delegated authority of the Board of the Graduate Research School or equivalent.

The most frequent concerns raised by supervisors relate to conflicts of interest between an examiner and a supervisor/advisor, especially with respect to co-authorship (B6). There is occasionally a tension between the need to find an independent examiner and the need to find an examiner with expertise in the field of the thesis, especially where that field is considered to be particularly narrow. It may be useful here to keep in mind that specific expertise in the narrow field of the thesis is not the only (nor necessarily the primary) consideration in selecting a potential examiner. An examiner's broad knowledge of the particular field of research, experience as a supervisor of HDR candidates and examiner of HDR theses, plus their broad familiarity with the expectations of Australian HDR courses are all considerations in the selection of appropriate examiners.

The most frequent concern raised by candidates is in relation to formal and informal contact between the candidate and potential examiners (A2). Candidates often ask if they should avoid attending conferences organised by a potential examiner or at which they may have contact with a potential examiner, avoid presenting papers in a department at which a potential examiner works, or avoid submitting papers to a journal edited by a potential examiner. No conflict of interest exists in these cases and it would defy common sense to consider proscribing such valuable activities. As a general rule of thumb, a conflict of interest exists where a potential examiner has worked with the candidate on matters of synthesis or analysis or has maintained a correspondence or other contact over an extended period in which the research has been discussed.
