3 PURPOSE

These Program Requirements set out the approved requirements for the Bachelor of Science.

4 OVERVIEW

4.1 Campus Availability
The Bachelor of Science has been approved for delivery on the Fremantle campus.

4.2 Student Availability
The Bachelor of Science is available for enrolment to domestic Students and international Students with a student visa.

4.3 Australian Qualifications Framework
The Bachelor of Science is accredited by the University as a Level 7 AQF qualification.

4.4 Duration
(i) The Volume of Learning for the Bachelor of Science is three (3) years of equivalent full-time study.

(ii) An option to complete this Program part-time is available.

(iii) An accelerated option to complete the Program is not available.

4.5 Maximum Duration
The maximum period of time within which a student is permitted to complete the Bachelor of Science is eight (8) years (including any periods of approved leave of absence) from the date on which they were first accepted into the program by the University.

4.6 Study Mode
The Bachelor of Science is offered in Internal Study mode.

4.7 Professional Accreditation
There are no professional accreditation requirements applicable to this Program.

5 ENTRY REQUIREMENTS

5.1 University Admission Requirements
To be eligible for admission to The University of Notre Dame Australia, all applicants must meet the University's minimum requirements for admission. The requirements for admission are detailed in the University's Policy: *Admissions.*

5.2 Specific Program Requirements for Admission
There are no further requirements for Admission to this Program.

6 PRACTICUM OR INTERNSHIP REQUIREMENTS

Students are required to complete SCIE3900 Science Internship that includes an industry placement of at least 225 hours.

7 PROGRAM REQUIREMENTS

7.1 Program Description

The Bachelor of Science offers a qualification grounded in the scientific pursuit of knowledge and understanding and delivered as a contemporary package that caters for the breadth of emerging careers in our rapidly changing world. A liberal and interdisciplinary approach to science education is coupled with flexible program streams that include the study of archaeological, environmental, biological, and human sciences. In this way students can follow their interests while acquiring professionally relevant and transferrable knowledge and skills. At the centre of the program is a focus on the development of fundamental skills in systematic and reproducible investigation, data analysis, critical thinking, problem solving and effective communication. Across the program, theory and practice are integrated through the use of diverse learning settings, from the laboratory and field to industry contexts. This preparation builds confidence, independence and self-directed learning that broadens opportunities for graduates in the private, government and not-for-profit sectors and opens pathways to postgraduate research.

7.2 Program Learning Outcomes

Upon successful completion of the Bachelor of Science graduates will be able to:

1. Articulate the methods and philosophy of Science and explain why current scientific knowledge is both contestable and testable.
2. Explain the role and relevance of Science in society.
3. Apply broad and coherent theoretical and technical knowledge with depth in one or more disciplines.
4. Synthesise and critically evaluate information from a range of sources.
5. Design scientific investigations, collect, and interpret data and draw conclusions showing creativity in problem solving.
6. Conduct investigations using practical and theoretical approaches.
7. Communicate results, information, and arguments to audiences for a range of purposes and in a variety of modes.
8. Apply current regulatory frameworks and exercise high personal and professional ethical standards.
9. Work independently as a reflective, self-directed learner and, where appropriate, in collaboration with others.

7.3 Required Courses

To be eligible for the award of Bachelor of Science students must complete a minimum of 600 Units of Credit, which include the following required and elective courses. See Appendix A for details.

- 50 Units of Credit from two (2) Core Curriculum Courses
- 200 Units of Credit from eight (8) compulsory Science Courses
- 175 Units of Credit from seven (7) Courses from a Science discipline stream
- 175 Units of Credit from elective Courses, which may be used to form a Minor or Specialisation. These electives may also be used, if combined with Core Science Courses or those required for a Science discipline stream, to form a Major. See 7.9 below.

7.4 Elective Courses

Any of the following elective Courses may be completed, where prerequisites and admission requirements allow:

(i) Courses that are available in any of the Majors, Minors or Specialisations of this Program offered by the School of Arts and Sciences and listed in Appendix E;

(ii) Courses taken by cross-institutional enrolment, including Study Abroad, as approved by the Dean; and

(iii) Up to 100 Units of Credit from general electives, including those from other Schools.

7.5 First-Year Courses

Students may not complete more than ten (10) 1000-level Courses in this Program, including those credited by Advanced Standing.

7.6 Honours

The Bachelor of Science is offered with Honours. Details are available in the Bachelor of Science

(Honours) Program Requirements (Program code 3496) and are to be read in conjunction with the *Policy: The Award of a Degree with Honours*.

7.7 Course substitutions

Course substitutions must be approved by the Dean or delegate.

7.8 Science Discipline Streams

Students MUST select one of the following four (4) discipline streams comprising seven (7) courses. See Appendix A for details.

- Biology and Environment
- Environment and Heritage
- Human and Medical Science
- Multidisciplinary Science

7.9 Majors

Core Science Courses or those required for a Science Stream may be used towards the completion of one of the following Majors:

- Archaeology
- Biology
- Environmental Management

Required Courses and approved Electives for each Major are listed in Appendix D.

7.10 Minors

Students may complete one (1) of the following Minors, the requirements of which are listed in Appendix D.

Behavioural Science
Business Studies
Data Analytics
English Literature
History
Journalism
Marketing & Public Relations
Mathematics
Philosophy
Politics & International Relations
Screen Arts
Social Justice
Theology

7.11 Specialisation

Students may complete the following Specialisation, the requirements of which are listed in Appendix D.

Photomedia
