Media and Moral Education A Philosophy of Critical Engagement By Dr Laura D'Olimpio

In an age of mass art and social media, the ability to identify reliable sources of information and disregard unreliable ones has become a vital skill. Yet, the educational environment has not kept pace with rapid advances in technology, despite the fact that educating students to engage critically and compassionately with others via online media is of the utmost importance. '*Media and Moral Education: A Philosophy of Critical Engagement*' addresses this oversight by demonstrating that the study of philosophy can be used to enhance critical thinking skills that are sorely needed in today's technological age.
