Nominations for UNESCO ICT in Education Prize

The theme of 2018 Prize is "The use of innovative information and communication technologies to ensure education for the most vulnerable groups." This year the Prize will also highlight projects that use integrated solutions that blend commonly used technology with frontier ICT applications, including big data analytics, robotics, machine learning, artificial intelligence (AI), augmented realities (AR), etc.Two awards will be granted, and each recipient will receive USD 25,000.

The deadline to submit nominations is **31 October 2018** and the online platform is available both in English and French. Please see here for more on the nomination process.

As an affilitated member of UNESCO, ICDE is able to make nominations for this prize. Please contact the ICDE Secretariat for more information at icde@icde.org.

Ensuring access to higher education for refugees

UNESCO is the leading force in global efforts to help all students, including refugees, to better access higher education. For many refugees, providing documentation to prove their qualifications can be difficult. In 2019, UNESCO will increase its efforts to improve refugees' access to higher education with the adoption of a new Global Convention on the Recognition of Higher Education Qualifications.

Hamdan Bin Mohammed Smart University launches Smart Advising System based on technological innovation and artificial intelligence

As part of its pioneering efforts to adopt technological innovation and promote creative thinking for smart learning and the knowledge industry, Hamdan Bin Mohammed Smart University (HBMSU) celebrated the launch of the Smart Advising System for its learners starting fall of 2018, reinforcing its position as the first university in the Arab World to adopt a new smart and innovating learning system that represents a key step in the path of smart learning, especially in the move to advise learners and helping them in a 24/7 interactive electronic environment. The university is the first in the region to create a smart learning system that will help learners choose the right pathways and courses to enhance the university's progress in keeping pace with the rapid developments of the 21st century.
