

EQUIP

YOURSELF

A Notre Dame and YouthCare Project
in the Faculty of *Education,
Philosophy and Theology*

Our Vision: Theology and the Community

The opportunity for Philosophy and Theology students (PTs) to connect their on-campus university learning with the 'real world' underpins the essence of course PHTH3001. Students who have completed their first year, and are practicing Christians are invited to enrol in this elective course knowing that you will be provided with the opportunity to apply university learning in an authentic 'real world' context that is essential for consolidating your knowledge.

Notre Dame has partnered with Youth Care to create rich learning opportunities in their Christian Values Education (CVE) and Treasure Hunters program that runs locally in primary schools. For students partaking in this course, we envision the development of interpersonal skills including character, confidence and resilience to improve professional readiness in the workplace.

PHTH3001

Internships may take a student to such areas as Government, Non-Government Organisations and the Church, in which the critical thinking, communication, ethical, and research skills they have honed at University will be tested in the workforce.

Internship students will, ideally, be exposed to a wide range of workplace issues, including professional practice and ethical issues inherent in professional life.
