*Are you a Registered Nurse or Health Professional
looking to refresh and develop your skills?*

***Date: 25 September, 16 October, 20
November, 11 December***

Time: 11am-2pm (AWST) 1pm - 3pm (AEST)

Cost: \$165 (inc. GST)

CPD Hours: 8 hours

***Location: Online webinar - register to receive
an access link***

The Acute Clinical Deterioration online course is a 3 hour webinar based professional programme focusing upon the recognition and response to the clinically deteriorating adult in the hospital setting. The course utilises a mixture of presentations, workshops, and case study clinical scenarios to apply knowledge and skills using a structured ABCDE approach to the assessment

and management of clinical deterioration. This approach to learning facilitates understanding of the core physiological changes linked to clinical deterioration, the need for rapid intervention, teamwork, communication and collaboration across professional groups.

Course Learning Outcomes

1. Improve outcomes for hospital patients at risk of clinical deterioration
2. Develop further understanding of the processes contributing to physiological decline
3. Advance the practitioners knowledge, skills and confidence in the recognition and response to clinical deterioration
4. Promote teamwork, effective communication and awareness of human factors in recognising and responding to clinical deterioration

About the facilitator

Dr Steven Hardman

Senior Lecturer | School of Nursing & Midwifery

The University of Notre Dame Australia

RN (Adult), DipHE Nursing, BSc (Hon), PGCert Higher Education, PGCert Critical Care, MSc, PhD

Dr Steven Hardman is a registered nurse with 26 years of post graduate experience. Steve has worked in a variety of settings across the globe including clinical, educational and military roles. He completed a PhD at The University of Notre Dame Australia with his research focusing on the role and competencies of graduate nurses dealing with

clinically deteriorating ward patients. His areas of expertise are within acute and critical care nursing, clinical deterioration, advanced life support and resuscitation. Steve continues to work clinically as a senior nurse within a Metropolitan intensive care unit.

Steve is currently employed within the School of Nursing and Midwifery as a senior lecturer. This involves coordinating, developing and delivering several undergraduate and postgraduate nursing and multi-professional courses. Other roles and responsibilities undertaken by Steve include chairing the School Exam Committee, acting as academic liaison for undergraduate students, membership of the School Research Committee and the supervision of several higher degree by research students.

Testimonials

"Great presentation.....would nearly tempt me to do a longer course. Really perfect for my needsI have promoted it with my colleagues"

"The depth of the pathophysiology was just right and very relevant to a true clinical scenario."

"The whole thing was absolutely fantastic. So easy to listen to and understand. Loved the case studies. The 3 hours went so fast, it was a great webinar having never done one before, thank you."

"The presenter was knowledgeable and really good to listen to. He managed to be interactive without visible students which I thought was very impressive! The course flowed well and he didn't dwell on particular slides for too

long. He talked about the slide instead of just reading it which, unfortunately, is what I've come to expect from many lecturers. Would definitely recommend."

"This course allowed me to consolidate prior knowledge while also providing me with more information and confidence."
